Volume 58, No. 5
June-August 2008

DID YOUR SHOPPING LIST KILL A SONGBIRD?

BY BRIDGET STUTCHBURY
[CONDENSED FOR SEQUOIA NEEDLES
BY CORDELIA NAUMANN]

Though a consumer may not be able to tell the difference, a plump red tomato from Florida is often not the same as one grown in Mexico. Imported fruits and vegetables found in our shopping carts in winter and early spring are grown with types and amounts of pesticides that are usually illegal in the United States.

The victims of these pesticides are North American songbirds. Bobolinks, also known as skunk blackbirds, were once a common sight in the Eastern United States. In mating season, the male in his handsome tuxedo-like suit sings deliriously as he whirrs madly over the hayfields. Bobolink numbers have plummeted almost 50 percent in the last four decades, according to the North American Breeding Bird Survey.

Bobolinks are being poisoned on their wintering grounds by highly toxic pesticides. Rosalind Renfrew, a biologist at the Vermont Center for Costudies, captured Bobolinks feeding in rice fields in Bolivia and took samples of their blood to test for pesticide exposure. She found that about half of the birds had drastically reduced levels of cholinesterase, an enzyme that affects brain and nerve cells — a sign of exposure to toxic chemicals.

Since the 1980s, pesticide use has increased five-fold in Latin America, as countries have expanded their production of nontraditional crops to fuel the demand for fresh produce during winter in North America and Europe. Rice farmers in the region use monocrotophos, methamidophos, and carbofuran, all agri-

cultural chemicals that are rated Class I toxins by the World Health Organization. These pesticides are highly toxic to birds and are either restricted or banned in the United States.

A single application of a highly toxic pesticide to a field can kill seven to 25 songbirds per acre. About half the birds that researchers capture after such spraying are found to suffer from severely depressed neurological function.

Testing by the U.S. Food and Drug Administration shows that fruits and vegetables imported from Latin America are three times as likely to violate Environmental Protection Agency standards for pesticide residues as the same foods grown in the United States. American consumers can discourage this poisoning by avoiding foods that are bad for the environment, bad for farmers in Latin America, and bad for their own families.

What should you put on your bird-friendly grocery list? Organic coffee, for one thing. Most mass-produced coffee is grown in open fields heavily treated with fertilizers, herbicides, fungicides, and insecticides. In contrast, traditional small coffee farmers grow their beans under a canopy of tropical trees, which provide shade and essential nitrogen, and fertilize their soil naturally with leaf litter. Their organic, fair-trade coffee is now available in many coffee shops and supermarkets, and it is recommended by the Audubon Society, the American Bird Conservancy, and the

MEETING PROGRAMS

BY PAULA MILLER AND SUE

COSSINS

California and Western Birds in Motion

By Larry Arbanas

Thursday, June 12, 7:00 PM

Please join us in welcoming Larry Arbanas, a Northern California bird filmmaker whose passion for filming birds began in 1989. He has steadily developed his passion into his profession since moving to California a decade ago.

We will have the opportunity to see his film, *California and Western Birds in Motion*.

As a Field Research Associate of the Cornell Lab of Ornithology, Larry can access the finest Hi-Def television equipment to produce these bird movies.

We are the recipients of his good fortune!

Monthly Meetings

San Mateo Garden Center

605 Parkside Way, San Mateo

Parkside Way is west of
Alameda de las Pulgas between 26th &
28th Avenues.

Expect to see Burrowing Owls at the Don Edwards National Wildlife Refuge, White-tailed Kites near Mt. Diablo, Clapper Rails at Arrowhead Marsh, birds of Bishop and birds of Southeast Arizona/Sonora Mexico among many others.

This promises to be a very special evening! We look forward to seeing you.

A potluck dinner beginning at 6 P.M. will precede this program. Doors open at 5:30 PM. Please bring a plate, cup, utensils and a side dish to share. SAS will provide the main course, hot beverages, and dessert.

A raffle of birding items will also be held. Tickets are \$1.00 apiece or six for \$5.00. Donations of prizes are kindly accepted. Questions? Call Carol Masterson 650-347-1769

Avian Anatomy & Physiology: Know Your Birds Inside and Out!

By Stephanie Ellis

Thursday, September 11, 7:00 PM

Learn to appreciate birds beyond their field identification! This class will focus on "how a bird works" with slides that provide an overview of the avian skeleton, as well as the basics of the digestive, respiratory, circulatory, and reproductive systems as compared to mammals. Participants will also be introduced to adaptations of birds that enable a certain life style (such as salt glands in seabirds), how a bird responds to heat and cold stress (i.e., counter-current exchange blood flow in the legs), and the significance of bill shape, toe arrangement, feather structure and more! Join Stephanie Ellis for this fun and informational class to learn birds inside and out.

Accompanying Field Trip

Saturday, September 13

Place and time TBD.

(Shopping List, continued from page 1)

Smithsonian Migratory Bird Center.

Organic bananas should also be on your list. Although bananas present little risk of pesticide ingestion to the consumer, the environment where they are grown is heavily contaminated by pesticide use.

When it comes to nontraditional Latin American crops like melons, green beans, tomatoes, bell peppers, and strawberries, it can be difficult to find any that are organically grown. We should buy these foods only if they are not imported from Latin America.

Now that spring is here, we take it for granted that the birds' cheerful songs will fill the air when our apple trees blossom. But each year, as we continue to demand out-of-season fruits and vegetables, we ensure that fewer and fewer songbirds will return.

FIELD TRIPS

BY CAROL MASTERSON

Pescadero Marsh – State Park Docent Nature Walk

Sunday June 1, 10:00 AM -Noon

Come discover Pescadero Marsh. A California State Park Docent will lead a field trip to learn about the Marsh. This beautiful park has a mile-long shoreline, rocky cliffs, and of course a world-famous marsh. The birding at the Marsh is great at this time of year. The docents will point out the plants and animals that inhabit this San Mateo County treasure. Meet in the parking lot just south of the bridge on Hwy 1 at Pescadero State Beach. Wear clothing in layers for cold to sunny weather. Heavy rain cancels.

Directions: Go south from Half Moon Bay on Hwy 1, about 12 miles. Just past the bridge over Pescadero Creek, look for the south parking lot. If you get to the intersection of Pescadero Road and Hwy 1 you have gone too far. For more information, go to http://www.greenfoothills.org/news/2001/08-2001_PescaderoButano.html

Contact: Ranger Dave Augustine (650) 879-2170 or nolema@coastside.net.

Beginner/Family Nature Hike

Five Special Discounted Pelagic Trips with Shearwater Journeys

Bodega Canyon and Cordell Bank

Friday, August 1 – Special Sequoia discounted price \$160; regularly \$185

Historically we have seen Ashy Storm-petrels, Wilson's Storm-petrels, Northern Fulmars, Pomarine and Long-tailed Jaegers, Tufted Puffins, Cassin's and Rhinoceros Auklet, Pigeon Guillemots and, possibly, Laysan and Black-footed Albatrosses. We may see Arctic Terns, Buller's, Pink-footed, and Sooty Shearwaters. At low tide Bodega Harbor can be teeming with shorebirds. Don't miss this great trip at a great price.

Farallon Islands Pelagic Trip

Sunday, August 10 – Special Sequoia discounted price \$115; regularly \$135

Join the Shearwater Journeys team to see nesting Tufted Puffins, Common Murres, and Pigeon Guillemots. Last year we saw Long-tailed Jaeger, South Polar Skua, Rhinoceros and Cassin's Auklets, Black-footed and Pink-footed Shearwaters, Wilson's Storm-petrel, and a Leatherback Sea Turtle. This is a fun trip. We may also see Humpback Whales and dolphins. Please note: landing on the island is not permitted.

Fort Bragg – Offshore Pelagic Trip for Mega-rarities

Sunday, August 10 – Special Sequoia discounted price \$160; regularly \$185

This is a trip not to be missed. Drive up to Santa Rosa and spend the night then head out for a great day of pelagic birding off the northern California coast. You will have the possibility of seeing really rare

(Continued on page 4)

Upcoming Field Trips

(Continued from page 1)

September

Friday, 12th Monterey Bay

Friday, 26th Santa Cruz

Check the field trip descriptions for any special information or requirements. Late comers may be disappointed. For all field trips bring your binoculars, sun block, and water; wear sturdy walking shoes or boots, and a hat, and always dress in layers for hot, sunny weather to cool, windy conditions. While we will attempt to stay on schedule, circumstances may dictate changes to field trip leaders, dates, or times.

For the latest schedule and updates always go to the Sequoia Audubon web site, contact the trip leader, or call Carol at 650-347-1769.

SAS on Vacation

Just a reminder that SAS is on vacation during the months of July and August. We will return in September with our field trips and our September 11th member program. The program will be a birding class entitled *Avian Anatomy and Physiology* and will be presented by SFBBO's Stephanie Ellis.

Have a great summer 'til we see you in September.

birds, such as Merkhams Storm-petrel, Streaked Shearwater, Dark-rumped Petrel, and Yellow-billed Loon. Sign up early; this trip sells out.

**Monterey Bay Pelagic Trip – Fall Seabird Classic
Friday, September 12 – Special Sequoia discounted price
\$115; regularly \$135**

This fun all-day pelagic trip is organized by Debra Love Shearwater, an expert in seabird identification. This is an excellent time of year to see Southern Hemisphere seabird rarities with possible sightings of Black-footed, Laysan, and Short-tailed Albatross, and Bulwer's Petrel. This is also a good time for terns and Long-tailed Jaegers. We will also be on the lookout for Blue Whales and other marine mammals.

**Santa Cruz – Closer-to-Home Pelagic Trip
Friday September 26, Special Sequoia discounted price
\$115; regularly \$145**

Join us for what should be a great fall birding trip. Many interesting seabirds are attracted at this time of year by the increased food supply on the Santa Cruz side of the Bay. Along the shore we will look for Marbled Murrelets, Pigeon Guillemots, and Common Murres. Along the sea canyons we will look for Ashy and Black Storm-petrels. We will also look for Pink-footed, Flesh-footed, and Buller's Shearwaters, Red-necked Phalaropes, and Rhinoceros and Cassin's Auklets. And we will scan the Bay for whales, dolphins, porpoises and sea lions. This is a very nice boat with full galley.

Reservations are made on a first-come, first-served basis, and many of these very popular trips sell out months in advance. Please indicate a second-choice trip, in case your first choice is sold out. If making reservations for more than one person, include each person's name, address, phone/email, as required by the United States Coast Guard. For more information or to sign up go to <http://www.shearwaterjourneys.com>. To make your reservation, send check or money order to: Shearwater Journeys, PO Box 190, Hollister, CA 95024. A confirmation letter will be sent to you. Because of rising fuel costs there will be a fuel surcharge. Please mention that you are with Sequoia Audubon for the discounted rates – don't miss out on this great deal. This discounted rate is non-refundable, for any reason..

GOODBYE, MARY

BY SUE COSSINS

Mary Bresler, former SAS President and long-time Board of Directors member holding many offices, recently passed away.

Mary lived into her 90's and had to give up her last office with Sequoia Audubon, Secretary on the SAS Board, about ten years ago so she could stay home to care for her elderly husband. Those of us who have been with SAS longer than ten years remember Mary's quiet, friendly ways and her dedication to our organization.

Fall Birding Classes in San Francisco

Evening birding classes taught by Joe Morlan and endorsed by Golden Gate Audubon Society will be starting September 9, 10, and 11, 2008. All classes meet 7-9:15 PM in room 307 at Marina Middle School, 3500 Fillmore at Bay St. Free parking is in the school lot off Bay St. on the east side of the building.

The instructor is co-author of *Birds of San Francisco* and the *Bay Area and Birds of Northern California*. He is also coordinator of the recorded "Northern California Birdbox" sponsored by Golden Gate Audubon Society. Slides illustrate all lectures, and the text for all classes is *A Field Guide to Birds of North America*, fifth edition, by the National Geographic Society. *The Sibley Guide to Birds* is recommended as an adjunct text for Ornithology II & III.

Field Ornithology I meets on Tuesdays. It is an introduction to birds and birding, combining basic field skills with the study of bird ecology, biology, evolution, and behavior. Part A (EA101) starts September 9 and ends October 21; Part B (EA105) is a continuation of Part A. It begins October 28 and ends December 16.

Field Ornithology II meets on Wednesdays. It is a continuing in-depth study of the identification and status of North American birds including terns, jaegers, alcids, pigeons, and parrots. Part A (EA110) starts September 10 and ends October 22; Part B (EA115) starts October 29 and ends December 17.

Field Ornithology III meets on Thursdays. It is a continuing study of North American land birds including juncos, longspurs, grosbeaks, buntings, blackbirds, and orioles. Part A (EA120) starts September 11 and ends October 23; Part B (EA125) starts October 30 and ends December 18.

The instructor may arrange optional field trips on weekends. Please bring binoculars and field guides to class if you have them. Fees are \$140 for each seven-week course (\$125 for EA120 which is six weeks), with a \$10 discount if you pre-register at least a week early. Pre-registration is strongly advised. For further information call (415) 561-1860. To enroll, please register online at: <https://www.evolvewww.com/ce.ccsf/>

or mail or fax the registration form at: http://www.ccsf.org/Services/Continuing_Education/images/regform/reg.html.

For additional information see the instructor's web site at: <http://fog.ccsf.edu/~jmorlan/> or the official City College Continuing Education site: http://www.ccsf.edu/Services/Continuing_Education/

Swainson's Hawk

SWAINSON'S HAWK MIGRATION IN ANZA BORREGO STATE PARK

BY SUE COSSINS

During the last week of March 2008 my husband Bob and I camped at Anza Borrego Desert State Park. It's located northeast of San Diego.

We were a week or two late for the best wildflower display in the valley, but took some nice hikes up into the canyons and saw some colorful flowers, especially blooming cactus.

One particularly interesting sight in the valley was witnessing the Swainson's Hawk migration. The local birders count the hawks as they fly in every evening and fly out after sunrise during the months of March and April.

We learned that the Swainson's Hawk winters in South America and returns to breed in the Western and Midwestern US and Canada. Every evening starting at about 6:00pm the hawks can be seen coming in at a high altitude. They spiral down to the desert washes to feed on insects and caterpillars and then roost overnight in the nearby trees – mostly tamarisk. We witnessed about 300 hawks flying in over a period of an hour. As they flew overhead we could see the various color phases from light to dark.

Photo by Bob Cossins

Sphinx Moth caterpillar

When we first arrived in the desert and saw the 4 to 5-inch long Sphinx Moth caterpillars eating the wildflowers we were unhappy but realized later that they, in turn, were providing a meal for the hawks.

Join us for the Annual Summer Planning Meeting

The Board of Directors invites you to help with goal setting for the coming year on Saturday, July 26 from 9 AM to 3 PM, at the home of Gary and Shari Deghi, 8 Pinehurst Lane, Half Moon Bay. Bring a bag lunch; dessert will be provided by Sequoia Audubon. Please notify Gary if you plan to attend: gdeghi@h-bgroup.com or 650-726-1340.

PEOPLE PADDLE

Paddle for the Planet

Saturday & Sunday, June 14 & 15

This event is a fundraiser for SAS and other non-profits. Join hundreds of people and participate in this fun weekend, the Bay Area's largest Paddlefest and Adventure Sport Fair, at Leo Ryan Park, Foster City Lagoon. Learn how to kayak. Get your family and friends involved to pledge donations for Sequoia Audubon. There will be kayak clinics and demos, film fest, races, and fishing. There will be activities for kids and adults.

To register, make a pledge, reserve a rental boat, take some training, or get fundraising tips phone Dean McCully at (408) 404-1289 or go to <http://www.aquanfest.com/> or <http://www.peoplepaddle.com/planet>. When registering or pledging, remember to select Sequoia Audubon as your favorite organization.

SAS NEWS

Half Moon Bay State Beach Snowy Plover Watch Program

Rita Jennings

We suspect that one or two pairs of plovers are thinking about nesting, but no nests have been found yet. Plover Watch volunteers are diligently monitoring the beach for any courtship or nesting activities.

Ranger Nelle Lyons advises that the Snowy Plover breeding survey is planned for the week of May 19.

Pescadero Marsh Update

Rita Jennings

The Pescadero Marsh docents continue to do a great job leading Sunday tours. Tours are held at 10 AM on the first Sunday and at 1 PM on the third Sunday of each month. The heron rookery is where the action is, but the marsh also has abundant native plants coming into bloom. The meeting place for tours is still the parking lot on Highway 1, south of the bridge across Pescadero Creek. Check the field trip section for more information.

Conservation Program

Open Space Vote in Redwood City

Robin Smith

Conservation Coordinator

A group of conservation organizations, including Sequoia Audubon Society, have joined together to put an Open Space Vote measure on the ballot in Redwood City for the November election. The purpose of the measure is to allow Redwood City voters to have the final say on any proposal to develop on city parks, open space, or baylands. Any development placed on open space land would need to be approved by a two-thirds vote. Building or expanding public recreation facilities on open space will not require a vote.

The Conservation Committee sent information and petitions to all our members who live in incorporated Redwood City asking for their help in collecting signatures to qualify this measure for the ballot in November. If you received one, please do your best to sign and return it. Get your friends and neighbors to join in.

The Open Space Vote supporters need to collect about 5,500 signatures, which is 15% of the people who voted in the last election. As of last weekend, they were halfway to that goal. Give them a hand in this endeavor. It will be a boon for our local birds.

Redwood City General Plan Update

Nancy Arbuckle

The City of Redwood City is in the process of updating its General Plan. This update may well affect lands that are currently zoned as Open Space. The Plan has many implications for traffic patterns, intensity of development, possible daylighting of creeks, as well as potential rezoning of the Cargill Salt Flats. The City has a number of affinity group meetings scheduled. I attended the one for environmental groups held in early April. The City heard from developers and builders the day before.

In attendance at the meeting wherein I represented Sequoia Audubon were representatives of the Friends of Redwood City, Sierra Club, Greenbelt Alliance, and the Committee for Green Foothills. A number of issues were on the table including support for public transit and development in transit corridors. There was complete consensus among environmental groups represented that open space remain open and that the Cargill site retain its open space zoning and be returned to wetlands.

The General Plan update is slated to take months. Updates on the process may be found on Redwood City's website, <http://www.redwoodcity.org/cds/planning/generalplan.html>.

VOLUNTEER OPPORTUNITIES

BY SUE COSSINS

What can you do? We have lots of great jobs. Get involved with Sequoia Audubon and help the birds with some of these volunteer opportunities. Take a look at these listings and see if you might be able to give us a hand. Call Sue Cossins (650) 347-9358 or check our website for more information www.sequoia-audubon.org.

Update Our SF Peninsula Bird Guide for the 21st Century

SAS needs assistance updating its local birding guide, *San Francisco Peninsula Birdwatching*. First published in 1984 and revised in 1996, it stands as a major accomplishment of Sequoia Audubon Society. It is time to create another revision and place it online at the Sequoia Audubon website. This is a major project, which will develop and change over time. The project will begin with scanning the contents of the 1996 edition and then gradually updating the info. We will update one birding site at a time, so we need lots of help with many different small jobs. Help take a small piece of this important project:

- Update birding information.

- Visit birding sites around the Peninsula.

- Help with an inventory of habitats, flora and fauna.

- Double check local area bird records for correctness.

- Help prepare visual materials and copy for the web.

- Update location maps; find pictures and information about SM County birding sites.

If you have computer knowledge (or want to learn), or if you are a birder with knowledge of local sites or are interested in bird populations, we need your help getting this project onto the web. Possible college credit/internship for students.

Contact: Jennifer Rycenga gyrrlfalcon@earthlink.net

Sequoia eNews Editor

Help our members stay in touch with what's happening at Sequoia Audubon. Send monthly updates via email to Sequoia Members.

Requirements: Writing or editing skills and ability to send emails.

Time: 1-3 hours per month.

Location: Work at your home on your own computer or at the Sequoia Office.

Contact: Carol Masterson (650) 347-1769

Greeter at our Monthly Meetings

Help to greet visitors and new members at our Thursday night monthly meetings.

Requirements: Enjoy meeting new people. Help make new members welcome.

Time: Approximately 2 hours a month at our monthly meeting.

Location: San Mateo Garden Center
